Forecast for Saturday 15 Aug 2020

Weather: Cloudy through the early hours with hill fog and patchy rain and drizzle. Staying cloudy through much of the morning with patches of hill fog likely. Some brighter spells developing through the afternoon especially in the west, along with a risk of a few sharp and possibly thundery showers. Showers then continuing through the evening and becoming more frequent with cloud again spreading from the east. Feeling humid throughout.

Chance of cloud free mountain/hill tops above 600m: 20%, but with a slightly higher chance in the west, with widespread bases down to 500ft, some falling to 400ft. Increasing to 70% into the afternoon, with only isolated bases down to 300ft. Becoming around 10% through the evening with encroaching cloud from the west.

Visibility: Generally moderate or good, but poor or very poor in the low cloud.

Forecast for Sunday 16 Aug 2020

Weather: A wet start to the day with widespread rain or showers, occasionally heavy with a risk of thunder. This will be accompanied by widespread low cloud and patches of hill fog. Showers generally easing through the day, but staying cloudy into the afternoon, with a further risk of heavy and thundery showers after dusk.

Maximum wind: Northeasterly 15-20mph with gusts 25-30mph at first, easing through the day.

Chance of cloud free mountain/hill tops above 600m: Less than 10% with risk of hill fog through much of the day, bases occasionally falling to 300ft.

Visibility: Mainly moderate, but frequently poor or very poor through the morning in the risk of heavy showers.

Temperature: **Valleys:** Plus 15 becoming 21 Celsius.
At 600m: Plus 15 Celsius.
Freezing level: Well above the summits.
